

FOR IMMEDIATE RELEASE

## **Disk Hero announces “CARBON COPY”**

Dublin, CA, September 2, 2008 – Disk Hero has announced a new application integrated into its main remote backup solution, called Carbon Copy. Carbon Copy sends a copy of file changes between your multiple computers including external drives so you always have a current file copied to a 2nd or 3rd PC no matter which of your systems you are using - home PC, office PC, Laptop or mobile external devices. This means if a USB drive is lost or a laptop stolen you always have a full copy of your data at Disk Hero and on your 2nd PC.

Disk Hero Carbon Copy is an automated Carbon Copy program to keep your data on multiple computers up-to-date with the latest current file information. You modify a file on your main PC and all your other target PCs are automatically updated with this recently changed file. A full copy of the main PC backup files are sent over to the target system(s) so full data duplication is realized. See our web site for more details [www.diskhero.com/cc.cfm](http://www.diskhero.com/cc.cfm)

### **About Disk Hero**

Everyone has documents, pictures, music and other important files that would be difficult or impossible to replace. Disk Hero has over 42,000 customers using a complete suite of backup solutions for individuals and small businesses. Visit [www.DiskHero.com](http://www.DiskHero.com) for additional information and a backup solution of your own.
