

FOR IMMEDIATE RELEASE

## **Disk Hero and NCAL Computer Source, Inc. Announce Joint Marketing Agreement**

Dublin, CA, November 16, 2007 – Disk Hero has incorporated its new Remote Target capability product as part of its reseller offering for NCAL Computer Sources, Inc. This allows NCAL to offer automatic data backup and a rapid data recovery solution for their business and individual customers in any data loss situation.

The additional copy of all backed up data is stored at the NCAL Pleasanton, CA location with its own encryption and password protection. This local copy allows NCAL to restore even large amounts of lost data as quickly as they can assemble a new computer for a customer.

“The data encryption eliminates our customer’s worry about theft of sensitive data. The customer controls one password, and NCAL has a second password. This combination unlocks the encrypted data, providing double protection for my customers,” stated NCAL’s owner José Oliveira.

José went on to say that, “Disk Hero’s online backup has a very simple ‘set it and forget it’ installation and the automatic backups occur in real-time with no additional steps by our customers. I want all of our customers on Disk Hero so no one ever loses data again.”

### **About NCAL**

NCAL has distinguished itself by combining advanced technologies with quality assured systems that deliver outstanding performance for home, small business and corporate end-users in the Bay Area since 1993.

NCAL meets and exceeds its client’s expectations on a regular basis with combining value, reliability and performance into one solution. NCAL Computer Source, Inc. has partnered with numerous leading computer component and software manufacturers to provide exceptional service and assurance for its customers.
